A Smarter Choice..*

## Natures own corrosion protection and lubricant

Very few, if any, products on the market today can boast that they have been designed by nature and rigorously tested for centuries. **Woolube Lanolin** products can boast exactly that. We haven't tried to improve on nature's product, we simply made it easier to use!!

Ancient European Warriors and Mariners used Lanolin (Wool Grease) to protect and lubricate their weaponry, leather, and timber for many centuries. To this day Lanolin serves many of the world's Navies, who insist on the time proven anti-corrosion protection that Lanolin (Nature's own ant-oxidant) provides for all metal structures and fittings.

This natural, non-toxic product has virtually limitless applications in the modern boating industry and endless uses on farm machinery and irrigation equipment, in metal fabrication, for motor vehicle component protection, trailers, leather, sporting equipment, as a welding anti-spatter agent and for multitude of household chores.

**Woolube Lanolin** is available in two basic forms. **WOOLUBE GREASE** and **WOOLUBE OZSPRAY**. Both will provide Lanolin's famous corrosion protection. Preference is given to either one depending on where it is used and the necessary application method required.

# OZSPRAY

**WOOLUBE OZSPRAY** liquid lanolin, the environmentally friendly alternative that comes in two grades - Industry and Industry Extra. The two grades cover applications from general household, automotive and electrical to industrial, mining and marine applications.

**WOOLUBE OZSPRAY INDUSTRY** is a sprayable form of the famous Woolube Grease which dries to a fine grease film offering the same characteristics as the grease, as well as being an excellent

fluid displacement, penetrant and lubricant in one multi purpose product.

**WOOLUBE OZSPRAY** Industry and Industry Extra are perfect for use on ferrous and non ferrous materials such as steel, tin, copper, iron, stainless steel, timber, leather, canvas and many plastics.

The **WOOLUBE OZSPRAY** product range is available in 1Lt, 5Lt, 20Lt and 300g Multi-Purpose Aerosol.

# GREASE

**WOOLUBE GREASE** has it's rightful place in heavier duty applications especially under water, where a more liberal coating is required.

**WOOLUBE GREASE** is a thick, tacky grease with high load capabilities that will not wash out under most conditions, from under water to general usage. Melt and apply with a paintbrush for heavier protection/rejuvenation.

**WOOLUBE GREASE** will provide excellent results as an anti-corrosive, thread anti-seize and general lubricant. **PLEASE NOTE: Not to be used as a high speed bearing lubricant.**

The above products are available in 300ml, 1Lt, 4Lt, 10Lt, 20Lt and 200Lt.

## EZICUT CUTTING FLUID

**EZICUT** is an operator friendly pre-mix water based blend of natural oils and waxes suitable for general purpose and industrial machining, milling, cutting, drilling, grinding and tapping. Apart from the obvious benefits of this cutting, drilling and cooling lubricant for all machinery operators, **EZICUT** is a smarter choice for our environment.

**WOOLUBE** protective compounds incorporate anhydrous lanolin in a special combination of extremely efficient, non-toxic corrosion inhibitors, penetrants and conditioning agents providing long term protection of all types of metals against rust, acids, alkalis, even salt.

**WOOLUBE** never evaporates or completely hardens. Instead, **WOOLUBE** forms a surface skin where exposed to air or water and remains soft in contact with metal- providing a non-stop 'reservoir' of active anti-corrosion inhibitors.

### PRODUCT TESTS

**Mines Approved:** (Hazardous Area) Conducted by NSW Department of Mineral Resources Mines Safety Laboratories.

**Dielectric Capabilities:** Woolube Lanolin Products have been successfully tested as an insulator coating to 70KV by Energex.

**Food Grade Approved:** Woolube Lanolin Products has the appropriate instruments approval for chemical compounds under the export control act 1982.

**Lubrication:** Woolube Lanolin Products has been tested and successfully completed an SRV Report for lubrication, conducted by BHP Laboratories.

**WOOLUBE LANOLIN** is an invaluable product for most industries. It will preserve and protect your equipment, machinery and products.

**ALL AUSTRALIAN • TOTALLY NATURAL**  
**NON TOXIC. NON EVAPORATIVE**  
*A product that works the way it should!*

#### COMMON SITUATIONS THAT WILL BENEFIT FROM THE APPLICATION OF EITHER GREASE, SPRAY OR BOTH

Application	Preferred Woolube Product	
	1st Pref.	2nd Pref.
Anchors & shackles	Grease	Spray
Auto Rustproofing	Spray	Grease
Battery Terminals	Grease	Spray
Boat Trailers	Spray	Grease
Boat Trailer Springs	Grease	Spray
Chains	Grease	Spray
Electrolysis	Grease	Spray
Firearms	Spray	Grease
Golf shoes & Sprigs	Spray	Grease
Heavy Machinery	Grease	Spray
Hinges	Spray	Grease
Irrigation Plant & Pipes	Grease	Spray
Leather & Vinyl	Spray	-
Low/High Volt Connections	Spray	Grease
Outboard Motors	Spray	-
Power Heads	Spray	-
Propellers & Skegs	Grease	Spray
Rubber Gaskets & Seals	Grease	-
Saddlery/Harness	Spray	Grease
Sporting Equipment	Spray	Grease
Steel Preservations	Grease	Spray
Stern Drive Legs	Spray	Grease
Thread Anti-Seize	Grease	Spray
Timber Preservation	Spray	-
Welding Anti Spatter	Grease	Spray
Winch Cables	Grease	Spray
Yacht Standard Rigging	Grease	Spray
